*NOTE: All our transplanted Spruce and Fir have been spaced 4" x 7" and have heavy Root Systems. We feel that a transplant will out perform seedlings and are well worth the extra cost.

All seedlings have been root pruned each year of their growth. We use an undercutting blade in October before plants are lifted in spring. This insures a fibrous side-branching root system.

Order: 100 each at the 100 Rate or 1000 each at the 1000 Rate.

DISCOUNTS: Less five percent on quantities of 5,000 or more of a kind. Less fifteen percent on quantities of 25,000 or more of a kind. Let us quote you on larger quantities.
